Dear Hiring Team,

APPLICATION FOR A DATA ANALYST ROLE

I am excited to apply for the Data Analyst. As someone who enjoys turning numbers into stories, I am eager to learn and grow with a team that's making a real impact in the technology space.

In my recent roles at Emtech, Kwikpik, and Convexity, I have helped teams turn raw data into simple dashboards and clear insights that support smart decision making. Whether it's tracking app usage, customer feedback, or blockchain trends.

I am familiar with tools like SQL, Power BI, Google Sheets, GA4, and Web3 metrics like transaction volume and wallet activity. I have also worked closely with marketing teams, creating graphics and social media content to share insights in ways that everyday people can understand.

I am particularly drawn to the opportunity to work with a team that values data and insights as essential tools for driving real growth. I would love the chance to contribute to the team's mission, helping shape narratives that reflect the real-world impact being created through data.

Thank you for considering my application. I am looking forward to the chance to learn, contribute, and grow with you.

Warm regards,

Nwoke Christiana
